## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election of claims 5-9 in the reply filed on September 3, 2004 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 1-4 withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on September 3, 2004.

### ***Specification***

The disclosure is objected to because of the following informalities: on page 11, lines 6, 7 and 8, "trough-holes" should read "through-holes".

Appropriate correction is required.

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: The recitation of "remotely supported" in line 2 of claim 8 is not supported by the specification.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 5, 8 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Sato et al (Japan 2000-8886). Integrally molded stator 14 is a vibration insulator that suppresses vibrations from the engine to the motor. The motor is supported in a remote location as shown in Figures 1, 3 and 5.

***Allowable Subject Matter***

Claims 6 and 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

The throttle drive motor arrangements made of record and not relied upon are considered pertinent to applicant's disclosure.
